

Standing with you.

QuickCheck™ is an intuitive and easy to use patron self check-out station. The system has a touch screen monitor and offers step-by-step instructions to guide patrons through the check-out process of all library materials including CDs, DVDs, and magnetic media.

QuickCheck™ operates using both traditional bar-code labels or RFID labels and interfaces with all standard circulation software.

Sidekick™ remote administration software provides a unique tool to monitor the performance of single or multiple stations including retrieval of log files, configuration changes and software updates.

QuickCheck™ is installed in major public and academic libraries throughout North America. Ease of systems operation has resulted in patron usage rates far in excess of customer expectations.

QuickCheck™ Built-in

SELF-CHECK MODELS

- QC1 Patron Check-out of materials via barcodes, does not include a security feature
- QC2 Combines Check-out of materials via barcodes and EM security strip deactivation
